

# Hand protection foam spray

Art. No. 114573

Type No. 3130/200

Exemplary illustration

This hand protection foam spray forms a greaseless, invisible and water-resistant film that prevents various kinds of soiling from penetrating the skin and pores. Protects against harmful and irritant ingredients in aggressive chemical substances. The care effect is considerably improved due to the addition of liposomes.

Discontinued product. No longer available. New product 148498 (3130/250)

## Technical data

Odour	odourless
Colour	white
Specific properties	with liposomes, dermatologically tested
Description	Hand protection foam spray, 200 ml
Silicone-free	yes
Storage life	24 months

dermatologically tested

waterproof and providing lasting protection

## Commercial data

Customs tariff number	33043000
Country of origin	DE
eCl@ss 5.1.4	40030101
eCl@ss 9.0	40030101
UNSPSC_Code_v190501	53131607
UNSPSC_CodeDesc_v190501	Hand or body lotion or oil

## Material informations

REACH SVHC1 substance name	no
CAS no. SVHC 1	no CAS No.
RoHS materials notice	RoHS compliant
REACH Info	no SVHC substance included

## Product information

The skin is the largest and one of the most complicated organs in the human body, it has diverse adjustment and defense mechanisms and provides protection against environmental influences.

Bacteria, viruses and fungi can be found everywhere in the environment and also live on our skin. Most of them are harmless to us. Some of these microorganisms, however, can make us sick when entering our body. Skin damages are one of the many gateways for pathogens to the human body. Therefore, it is crucial to take care of and protect the skin.

One important element of effective skin protection is the special care with hand protection foam spray, which protects your hands from harmful environmental influences for several hours.

The hand protection foam spray provides temporary protection against aggressive sea and industrial environments, chemicals, solvents, alkalis, acids, salts, cleaning agents, oils, greases, cement, mortar, varnishes, adhesives or longer contact with aqueous media. However, the foam does not replace a conventional protective glove.

The hand protection foam spray does not block skin respiration, does not dry out the skin and protects it against swelling, irritations, inflammations and adhering dirt.

That way, the hand protection foam spray supports the skin in providing a natural protective barrier.

### Processing

Before starting to work, spray the foam onto the hands and rub it in, not omitting the finger tips and nail beds. Leave it on for 2 minutes until it forms a waterproof and invisible protective film free of grease. It prevents residues of lubricants and soiling of the most different kinds from penetrating skin and pores. After work, the dirt can be washed off very easily with warm water. Only in cases of heavy soiling, use additional cleaning agents.

### Storage

Pressurized container. Protect from direct sunlight and temperatures above +50 °C.

### Instructions for use

When using RIEGLER products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets ([www.riegler.de](http://www.riegler.de)) must be observed.
