

Pressure switch

»SYNTESI« series

Art. No. 144958 Type No. 5626S106

Exemplary illustration

Syntesi pressure switches feature a high degree of miniaturisation and a modern attractive design. As modular components in the Syntesi range, they can be installed either facing up or down.

They come ready assembled with a 2 metre cable or an M8 connector with a 300 mm cable.

The contact is the switching type, which means it can be used as a normally open or normally closed contact. It can be regulated via a knurled push-lock handle.

On the front and back there is a port (G 1/8 for size 1 and G 1/4 for size 2) that can be used with pressure gauges, pressure switches or as an additional air outlet.

Technical data

| Series | Syntesi |
|----------------------------------|---------------------------------------|
| Size | 2 |
| Function | Changeover |
| Max. input pressure | 13 bar |
| Adjustment range | 0.5 - 10 bar |
| Temperature range | -10 to 50 °C |
| Input | G 1 |
| Output | G 1 |
| Electrical connection | 2m cable |
| Protection IP | IP65 |
| Voltage max. | 250 V |
| Max. load | 2 A |
| Hysteresis min. (not adjustable) | 0.4 bar |
| Hysteresis max. (not adjustable) | 0.8 bar |
| Medium | Compressed air or other neutral gases |
| Housing | Technopolymer |
| A | 60.5 mm |
| A1 | 95,0 mm |
| В | 101.0 mm |
| F | 32.5 mm |

COMPONENTS

- Technopolymer adjusting "push lock" handle

 Total brass adjusting screw

 Steel piston spring

 Technopolymer body

 IN/OUT bushing made of OT58 nickel-plated brass or passivated aluminium for 3/4" 1"

 Technopolymer bottom plug

 Technopolymer pressure switch body

 Resin finish for IP65

 Electrical contact

 Oring NBR gasket

- O-ring NBR gasket
- 13 Technopolymer flange

ACCESSOIRES: SECURITY KNOB

| Code | Description |
|---------|-------------------------------------|
| 9200703 | Security knob APR / pressure switch |

OTE: Pull outwards to remove the knob from the pressure vitch on the unit. Insert the security knob and regulate the essure switch. Then press the handle firmly to lock it in osition. If the pressure switch needs to be reset, remove the curity knob by forcing it laterally with a screwdriver.

CI

GENERAL TECHNICAL DATA SUNTESI.

Syntesie is an important milestone achieved by Metal Work, the result of thirty years' experience producing air-treatment units. It has been studied in minute detail to obtain the best possible performance in a reduced space and with limited weight. The capacity is much higher than that of other units of the same size.

This modular unit features a very simple yet effective system that requires no brackets, stay bolts or yoke for assembling the elements. The basic version of Syntesi® incorporates numerous functions that are not provided or are only optional with traditional units. Examples are padlockable knobs, additional pneumatic ports on the front and back, flow options from left to right or vice versa, regulators with compensation system - which are accurate even when the upstream pressure changes, with rapid downstream pressure relief - full indelible marking, automatic condensate drain even in size 1, and 360° visual inspection of oil and condensate levels. The basic materials, technopolymer and nickel-plated brass have excellent corrosion resistance. An anti-corrosion version

is available with stainless steel components (screws, plates) or Geomet®-

FIXING TO FRONT PORTS

ROTARY BUSHINGS

LASER MARKING

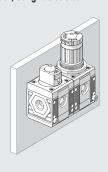

The following is marked indelibly on the body:
- Metal Work trademark

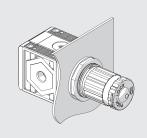

- Code
- Maximum pressure and temperature Degree of filtration or pressure range, where relevant
- Week and year of manufacture
- Atex categoryMade in Italy

MOUNTING OPTIONS

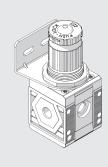

On the wall, using two screws

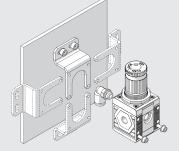

On a panel

Using knob bracket

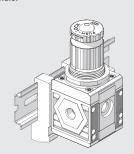

Using a bracket

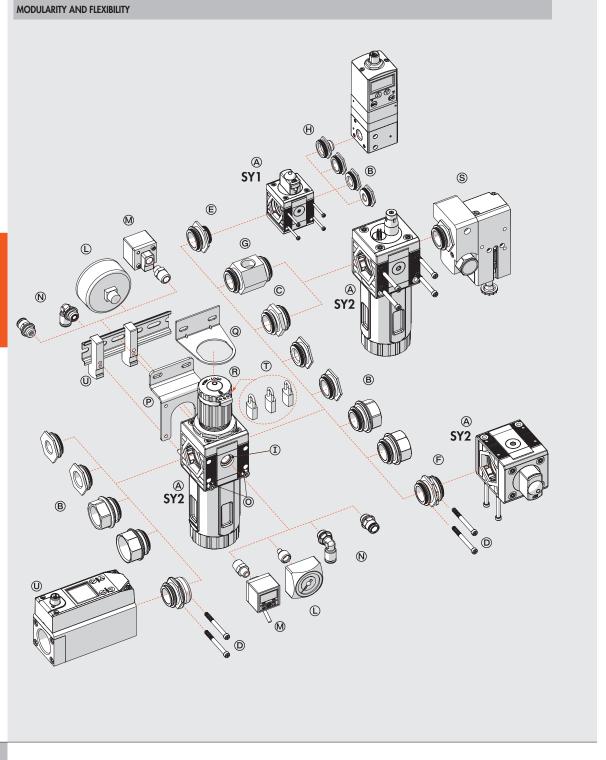

The bracket can be secured in any position, and the fittings can be mounted on the pressure gauge air intake at the back of the unit.

On a DIN EN50022 bar with the apposite adaptator

Page 6 of 10

GENERAL TECHNICAL DATA Syntesi®

C1 A

The various elements of Syntesie (a) can be connected to the air feed and delivery circuit using pneumatic nickel brass or passivated aluminium ports (B) and can be fixed together using nipples ©.

The nipples and ports are easy to remove by unscrewing the two front screws [®]. This solution has numerous advantages:

- Reduced overall dimensions.
- Free composition of multiple elements, without the need for brackets, stay bolts or yoke.
- The threads for the fittings are metallic, allowing high tightening torques, also for tapered threads.

 Maximum flexibility: a unit can be transformed at any time by adding an element or replacing a port with another one, e.g. 1/4" instead of 1/8".

- The air intake port can be the same or different from the outlet port, as desired. Standard Syntesi⊕ ports are: 1/8", 1/4", 3/8" for size 1; 3/8", 1/2", 3/4", 1" for size 2.

It may be necessary to use a vice to insert the bushes into size 2.

The nipples have different functions:

- Nipple © joins two elements of the same size together.
- Size adaptor © can be used to connect an element in the Syntesi® 2 series with one in the Syntesi® 1 series.
- The 90° adaptor (E) can be used to connect two 90° angled elements. For example, it can help directing the regulator knob or the control knob of a sectioning valve towards the user.
- The two-way air intake @ is a simple and cost-effective system which, besides connecting two elements together, has 2 opposing threaded air intakes.

- The adaptor for Regtronic ® can be used to fix the Regtronic 1/4" proportional valve to a Syntesi® size 1 element.

Additional ports ©. On the front and back of ALL Syntesi® elements there is a port (1/8" for size 1, 1/4" for size 2) that can be used for pressure gauges ©, pressure switches @ or, given the high flow rate, as additional air take-off @. These ports are downstream of the element, so, for example, a regulator port can supply air at a set pressure or a filter port can supply filtered air (not valid for activated carbon filter and depurator).

Wall fixing. Only two through screws @ are needed. No bulky brackets or additional flanges are required. The bracket @ can be used to separate

the unit from the fixing wall, e.g. to mount a fitting to the rear port.

Fixing on a DIN EN50022 bar. Can be done using the bracket kit ①.

Regulator fixing bracket ②. Regulators and filter-regulators can also be fixed using a steel bracket ③ that embraces the bell.

Padlockable knob ®. The knobs of regulators, filter-regulator and sectioning valves can all be padlocked. The steel plate is included in the supply. You can insert up to two 3 mm diameter padlocks ® on size 1 and three padlocks on size 2. As an alternative, the sectioning valve can have a steel plate suitable for a single 6 mm diameter padlock.

Safety valve (S). The unit can incorporate a series 70 SAFE AIR® safety valve.

Flowmeter series FLUX 1-2 (1). The unit can incorporate a series FLUX 1 or FLUX 2 flow meter.
