

Service unit

»SYNTESI« series

PLUS

Art. No. 145377

Type No. 5623F40D103

Exemplary illustration

Two-part service units consisting of filter and depurator of the »SYNTESI« series. For all information on the relevant properties, please refer to the data sheets of the individual components.

Technical data

Series	Syntesi
Size	2
Max. input pressure	10 bar
Temperature range	-10 to 50 °C
Input	G 3/8
Output	G 3/8
Front and back port thread	G 1/4
Recommended flow rate at 6.3 bar	1050 NI/min
Filter rating of the depurator	0 µm
Filter rating of the filter	5 µm
Condensate drain of the filter	RA fully automatic
Condensate drain of the depurator	RMSA semi-automatic
Output air purity class according to ISO 8573-1	1.7.2
Medium	Compressed air or other neutral gases
Housing	Technopolymer
Sealant	NBR
Bowl	Technopolymer
A	121.0 mm
A1	- mm
B	182.0 mm
F	38.2 mm

Commercial data

Customs tariff number	84213925
Country of origin	IT
eCl@ss 5.1.4	27292890
eCl@ss 9.0	27292890
UNSPSC_Code_v190501	27131604
UNSPSC_CodeDesc_v190501	Pneumatic lubricators

FIL + DEP SYNTESI®

For full details and list of components refer to the sections about filter and deparator.

TECHNICAL DATA	FIL + DEP SY1			FIL + DEP SY2			
	1/8"	1/4"	3/8"	3/8"	1/2"	3/4"	1"
Threaded port	0.01 - output air purity class ISO8573-1: 1.7.2						
Purifier degree of filtration	1 - output air purity class ISO8573-1: 3.7.3						
Filter degree of filtration	5 (yellow)						
Max. inlet pressure	15 bar			13 bar			
	1.5 MPa			1.3 MPa			
	217 psi			188 psi			
Suggested flow rate at 6.3 bar (0.63 MPa; 91 psi)	550 Nl/min			1050 Nl/min			
	9 scfm			37 scfm			
Maximum suggested flow rate	Look a the chart on the deparator page C1.12			Look a the chart on the deparator page C1.12 / C1.13			
Min/max temperature at 10 bar; 1 MPa; 145 psi	From -10 to +50 °C			From -10 to +50 °C			
Weight	358 g	353 g	344 g	942 g	915 g	911 g	899 g
Purifier condensate drain	RMSA: drain with manual condensate discharge and automatic discharge at zero pressure						
Filter condensate drain	RMSA: drain with manual condensate discharge and automatic discharge at zero pressure						
	RA: automatic drain with condensate discharge, independent of pressure and flow rate.						
	Version conveys the draining by inserting the pipe having internal diameter 6 mm in the lower port.						
	SAC: automatic drain with condensate discharge. Operates by pressure drop - requires variable air take-offs.						
	Note: the maximum input pressure for the RA version must not exceed 10 bar						
Fluid	Compressed air or other inert gases						
Bowl capacity filter/deparator	30/15 cm ³			70/40 cm ³			
Mounting position	Vertical			Vertical			
Port for additional air take-off	1/8", front and rear			1/4", front and rear			
Additional air take-off flow rate (not purified air)	500 Nl/min			1500 Nl/min			
at 6.3 bar (0.63 MPa; 91 psi) ΔP 1 bar (0.1 MPa; 14 psi)	18 scfm			53 scfm			
Wall fixing screws	No. 2 M4 screws			No. 2 M5 screws			

UNITS

FIL + DEP Syntesi®

GENERAL TECHNICAL DATA SYNTESI®

Syntesi® is an important milestone achieved by Metal Work, the result of thirty years' experience producing air-treatment units. It has been studied in minute detail to obtain the best possible performance in a reduced space and with limited weight. The capacity is much higher than that of other units of the same size.

This modular unit features a very simple yet effective system that requires no brackets, stay bolts or yoke for assembling the elements.

The basic version of Syntesi® incorporates numerous functions that are not provided or are only optional with traditional units. Examples are padlockable knobs, additional pneumatic ports on the front and back, flow options from left to right or vice versa, regulators with compensation system - which are accurate even when the upstream pressure changes, with rapid downstream pressure relief - full indelible marking, automatic condensate drain even in size 1, and 360° visual inspection of oil and condensate levels. The basic materials, technopolymer and nickel-plated brass have excellent corrosion resistance. An anti-corrosion version is available with stainless steel components (screws, plates) or Geomet®-treated ones (regulator springs).

UNITS

GENERAL TECHNICAL DATA Syntesi®

TECHNICAL DATA	SIZE 1			SIZE 2			
	1/8"	1/4"	3/8"	3/8"	1/2"	3/4"	1"
Threaded port							
Max. input pressure	bar	15			13		
	MPa	1.5			1.3		
	psi	217			188		
Flow rate	See catalogue of the various elements						
Min/max temperature at 10 bar; 1 MPa; 145 psi	°C from -10 to +50			°C from -10 to +50			
Padlockable knob	The knobs of the regulators, filter regulators and standard sectioning valves can all be padlocked						
Fluid	Compressed air or other inert gases						
Mounting position	See catalogue of the various elements						
Direction of flow	Flow options right to left or vice versa						
Additional air take-off, for pressure gauges or fittings	1/8", front and rear, on all modules			1/4", front and rear, on all modules			
Wall fixing screws	No. 2 M4 screws			No. 2 M5 screws			
Certification for potentially explosive atmosphere according to ATEX 2014/34/EU rule	 II 3G Ex h IIC T5 Gc -10°C < Ta < 50°C II 3D Ex h IIIC T100 °C Dc						

ANTI-CORROSION VERSION

- Differences compared to the standard version:
- stainless steel screws
 - stainless steel plate for R, FR, V3V knobs
 - Geomet®-treated regulator spring and filter-regulator

FIXING TO FRONT PORTS

Do not use a spanner for fixing taper threaded elements to the front ports. Mount by hand and apply a liquid sealant (not teflon®).

ROTARY BUSHINGS

3/4" and 1" bushings in Size 2 rotate freely to facilitate assembly operations.

LASER MARKING

The following is marked indelibly on the body:

- Metal Work trademark
- Code
- Maximum pressure and temperature
- Degree of filtration or pressure range, where relevant
- Week and year of manufacture
- ATEX category
- Made in Italy

MOUNTING OPTIONS

On the wall, using two screws

On a panel

Using knob bracket

Using a bracket

The bracket can be secured in any position, and the fittings can be mounted on the pressure gauge air intake at the back of the unit.

On a DIN EN50022 bar with the opposite adaptor

UNITS

GENERAL TECHNICAL DATA Synthesi®

MODULARITY AND FLEXIBILITY

UNITS

GENERAL TECHNICAL DATA Syntesi®

The various elements of Syntesi® ① can be connected to the air feed and delivery circuit using pneumatic nickel brass or passivated aluminium ports ② and can be fixed together using nipples ③.

The nipples and ports are easy to remove by unscrewing the two front screws ④. This solution has numerous advantages:

- Reduced overall dimensions.
- Free composition of multiple elements, without the need for brackets, stay bolts or yoke.
- The threads for the fittings are metallic, allowing high tightening torques, also for tapered threads.
- Maximum flexibility: a unit can be transformed at any time by adding an element or replacing a port with another one, e.g. 1/4" instead of 1/8".
- The air intake port can be the same or different from the outlet port, as desired.

Standard Syntesi® ports are: 1/8", 1/4", 3/8" for size 1; 3/8", 1/2", 3/4", 1" for size 2.

It may be necessary to use a vice to insert the bushes into size 2.

The nipples have different functions:

- Nipple ③ joins two elements of the same size together.
- Size adaptor ⑤ can be used to connect an element in the Syntesi® 2 series with one in the Syntesi® 1 series.
- The 90° adaptor ⑥ can be used to connect two 90° angled elements. For example, it can help directing the regulator knob or the control knob of a sectioning valve towards the user.
- The two-way air intake ⑦ is a simple and cost-effective system which, besides connecting two elements together, has 2 opposing threaded air intakes.
- The adaptor for Regtronic ⑧ can be used to fix the Regtronic 1/4" proportional valve to a Syntesi® size 1 element.

Additional ports ⑨. On the front and back of ALL Syntesi® elements there is a port (1/8" for size 1, 1/4" for size 2) that can be used for pressure gauges ⑩, pressure switches ⑪ or, given the high flow rate, as additional air take-off ⑫. These ports are downstream of the element, so, for example, a regulator port can supply air at a set pressure or a filter port can supply filtered air (not valid for activated carbon filter and depurator).

Wall fixing. Only two through screws ④ are needed. No bulky brackets or additional flanges are required. The bracket ⑬ can be used to separate the unit from the fixing wall, e.g. to mount a fitting to the rear port.

Fixing on a DIN EN50022 bar. Can be done using the bracket kit ⑭.

Regulator fixing bracket ⑮. Regulators and filter-regulators can also be fixed using a steel bracket ⑮ that embraces the bell.

Padlockable knob ⑯. The knobs of regulators, filter-regulator and sectioning valves can all be padlocked. The steel plate is included in the supply. You can insert up to two 3 mm diameter padlocks ⑰ on size 1 and three padlocks on size 2. As an alternative, the sectioning valve can have a steel plate suitable for a single 6 mm diameter padlock.

Safety valve ⑱. The unit can incorporate a series 70 SAFE AIR® safety valve.

Flowmeter series FLUX 1-2 ⑲. The unit can incorporate a series FLUX 1 or FLUX 2 flow meter.
