

Differential pressure gauge scale ranges: 0-0,5bar

port size

flange connection

weight

0.127 kg

technical data

- description: magnetic piston meter
- temperature range: 0 - 60°C
- mounting: vertical
- case: ULTRAMID plastic, black
- scales: white plastic, pressure = black, colour fields = green/red
- scale range: 0 - 0,5 bar
- max. working pressure: 16 bar

Note:

If the measuring system gets a pressure blow, the pointer locked above the red area of the display scale. It should be immediately checked the filter elements for damage and replaced if necessary.

Attention:

- Avoid strong vibrations
- Pressure connections should not be confused (notice directional arrow)
